

Complete package for iO Centre

Specialising in the provision of multi unit estates, Teeland iDG have completed thirty one 'iO Centre' projects across the UK, amounting to a combined value in excess of £230 million.

The iO Centre in Redhill is a new build development comprising of 6 large portal framed industrial units which house 32 separate business units in total. The external wall elevations are clad in both vertical and horizontal sheeting using 0.70mm BS18B25 Corus colorcoat HPS200 Ultra® and RAL9006 Silver Corus Colorcoat Prisma® pre-finished steel.

Quedron were chosen to supply over 13000m² of their 1000/32C profile together with all associated flashings and bespoke rainwater goods.

Commenting from their premises in Basildon, Julian Dear from Hardy Sherwood, said; "To run our company swiftly and efficiently, we need our suppliers to be proficient in their service. We feel that Quedron match these requirements by giving us a support package that places great emphasis on meeting performance, quality and delivery issues".
